

Acquire Service Basic (Powerup)

A basic scenario in which the cell phone attempts to acquire service after power up

Acquire Service Basic (Powerup)

6	MM selects the network in which to attempt to acquire service
12	RM will be in the Idle state camped on the available cell
15	UI displays service information to the user
16	Cell Phone enters Idle state
19	RM will be in the no service state since no available cell was found
